

WIDE RANGE OF PROFESSIONAL TRAINING MODULES

If you are a freight forwarder, cargo agent, shipper, postal operator, manufacturer, ground handling agent, packaging supplier, airline or anyone who is involved or want to build a career in the aviation and logistics industry, DGR Aviation has the required dangerous goods training suitable for you and your company.

Besides our brand-new training facility, we can also conduct in-house, customized training at your location.

Our consultant can do a training needs analysis and advise you on the most appropriate training required for your employees.

TESTIMONIALS

"We are very lucky to get trained by a former Dangerous Goods Regulatory Inspector. This training really helped me to know the different classes of DG and understand the IATA Dangerous Goods Regulations. Appreciate their admin staff professionalism and helpful attitude"

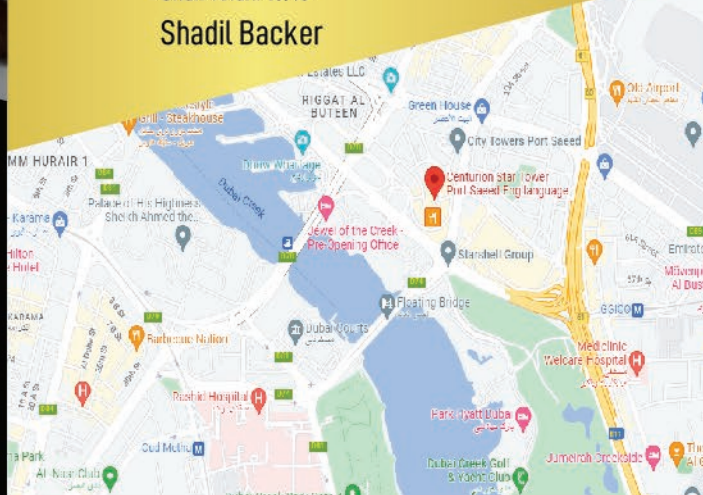

Muhammad Ashraf, AAA Freight Services

"Trainer is fabulous and has a very good experience in the DG field. The facility is very good. Thank you for your wonderful services and for training us."

Mohammed Naushad, JFS Logistics

"It's a privilege for me to attend the class under Shair Khan. 10/10"

THE GLOBAL BENCHMARK

IN DANGEROUS GOODS TRAINING

ABOUT DGR AVIATION TRAINING SERVICES

Dangerous goods are common in our day-to-day lives that you may even not be aware there are many things in your homes and offices that are dangerous goods.

Some of these examples are mobile phones and any other equipment that is powered by lithium batteries, perfumery products, paint, deodorant sprays, sanitizers, oven cleaners, cooking gas and many more.

These seemingly harmless items, when transported by air, can be dangerous. Vibrations, static electricity, temperature and pressure variations in the airplane can cause these items to leak, generate toxic and flammable fumes, start a fire, or even explode if these products are not declared and packed properly.

Training is critical to ensure compliance with the regulations. DGR Aviation Training is approved by the General Civil Aviation Authority to conduct dangerous goods training in the United Arab Emirates.

Whether you are the shipper, the freight forwarder, the cargo agent, or anyone who are involved in the air transport of cargo, you must be trained.

It all starts with dangerous goods training!
